Community service

Chair of non-profit school board in Windsor – 2008 – 2020

Active member of Rotary International 1918 – 2007 – Present

If elected to College Council, here is how I propose to ensure public protection.

I will work with the council to implement the recent strategic plan including, updating the quality assurance program, continuous education regulations, reducing risks, and working on the professional specialization plan. I plan on ensuring reduced public complaints, through optometrists who are well informed on regulations. I will continue to work with the council and ministry to finish the process of updating TPA regulation and improve public access. As vulnerable and underserved populations continue to grow, I will work to serve the public interest by having regulations and standards to improve public accessibility to optometric services.
